WHO IS ST. PATRICK? St. Patrick, or the “Apostle of Ireland,” actually started out in the pagan religion. While not much is known about his early life, as many of his life’s details were lost to folklore, letters from St. Patrick reveal that he was captured in Wales, Scotland, or another close area outside of Ireland and taken to Ireland as a slave. Years later, he escaped and returned to his family, who were Romans living in Britain, going back to Ireland for mission work after finding a place as a cleric and then Bishop within the Christian faith. He was born around 460, and by the 600s, he was already known as the Patron Saint of Ireland.

There are many legends associated with St. Patrick. The symbol of the shamrock used for St. Patrick’s Day comes from the story of St. Patrick using the shamrock to illustrate the Holy Trinity. The three-leafed plant coincided with the Pagan religion’s sanctity of the number three and is the root of the green color theme.

Another popular belief is that St. Patrick banished the snakes from Ireland. The story says that while St. Patrick was fasting, snakes attacked him, so he chased all snakes into the ocean. However, there have never been snakes in Ireland during the post-glacial period. The absence of snakes and symbolism involved with snakes is believed to explain the story, although it could have been referring to type of worm rather than snakes.

What I know about the day is wearing green or getting pinched, Irish food, and green beer, so whatever it is to you, please have fun and be safe!
